## Education

- **Gandhi Institute of Technology and Management** — Hyderabad, India
  *Bachelor of Technology - Computer Science and Engineering; GPA: 7.25* — *August 2022 - April 2026*

## Skills Summary

- **Languages**: Python
- **Web**: HTML5, CSS3, JavaScript, React.js
- **Tools**: Visual Studio Code
- **Version Control**: Git, GitHub
- **Platforms**: Windows, Web
- **Other Skills**: Front-End Development, Responsive Web Design

## INTERNSHIPS

- **Zidio Development**
  *Web Development Intern* — *Jun 2025 – Sep 2025*
  - **Responsive Web Development**: Created 2 responsive web applications using React.js, HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and improved user experience.
  - **Frontend Development**: Developed reusable UI components and responsive layouts following modern web development practices.
  - **Version Control**: Managed source code using Git and GitHub, debugged application issues, and maintained clean, well-structured code throughout the development lifecycle.
- **Prodigy InfoTech**
  *Web Development Intern* — *May 2025 – Jun 2025*
  - **Web Application Development**: Designed 5 responsive web applications, including a portfolio website, to-do app, weather application, landing page, and calculator using HTML5, CSS3, and JavaScript.
  - **Frontend Development**: Built responsive user interfaces with dynamic functionality, input validation, and API integration to improve usability and user experience.
  - **Code Quality**: Optimized website performance by applying frontend development best practices and maintaining clean, reusable, and well-structured code.
- **SmartBridge**
  *Salesforce Virtual Developer Intern* — *May 2025 – Jul 2025*
  - **Salesforce Development**: Engineered 10+ Salesforce components including custom objects, validation rules, Apex classes, Lightning Web Components (LWC), and Flows to implement business requirements.
  - **Process Automation**: Automated business processes using Screen Flows, Scheduled Flows, and Record-Triggered Flows, and integrated REST APIs using Named Credentials.
  - **Salesforce AI Automation**: Applied Einstein Copilot features, completed Trailhead Superbadges including Apex Specialist and Flow Optimization, and enhanced user experience with dynamic Lightning Web Components.

## Projects

- **Smart Railway Navigation System (React.js, Vite, Firebase, Leaflet.js, Tailwind CSS)**: Built a responsive indoor railway navigation web application using React.js, Vite, Firebase, Leaflet.js, and Tailwind CSS. Integrated interactive station maps, shortest-path navigation, custom station layouts, and a mobile-friendly interface to guide users from station entrances to platforms and train coaches. (July 2025) — **GitHub**
- **Service Recommendation System (Python, Streamlit, RAG, Gemini API, Machine Learning)**: Designed an AI-powered recommendation system using Python and Streamlit to provide personalized book and service recommendations. Integrated Retrieval-Augmented Generation (RAG), vector-based search, transformer-based ranking, user profiling, and Google Gemini API to generate context-aware and explainable recommendations. Tech: Python, Streamlit, RAG, Gemini API, Machine Learning, Transformer Models. (Jan 2026)

## CERTIFICATIONS

- Python Essentials 1 – Cisco Networking Academy — March 2025
- Web Development Internship Certificate – Future Intern — May 2025
